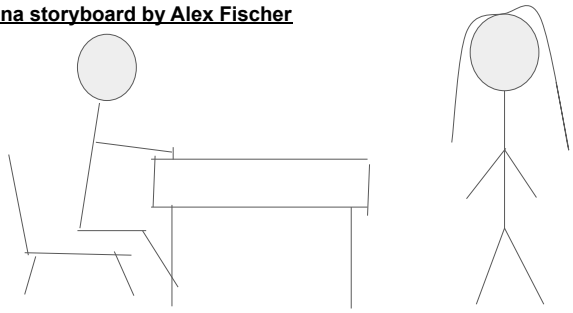
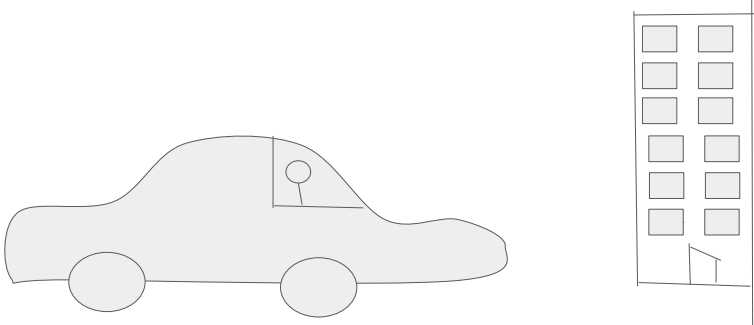
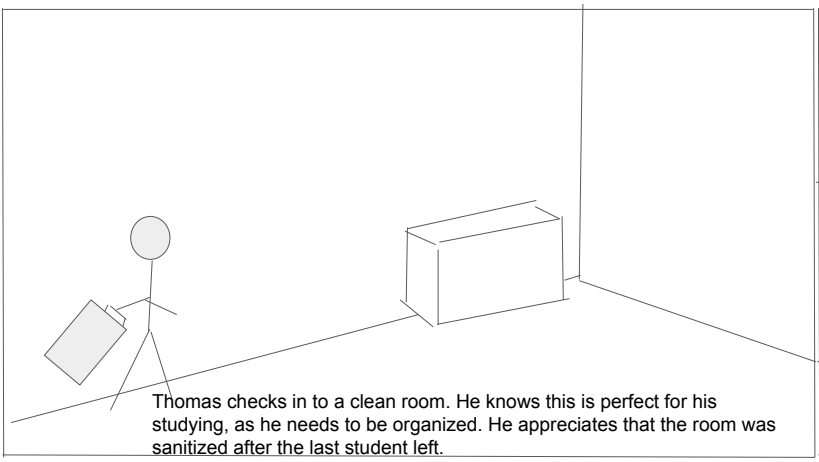
Thomas Michel persona storyboard by Alex Fischer



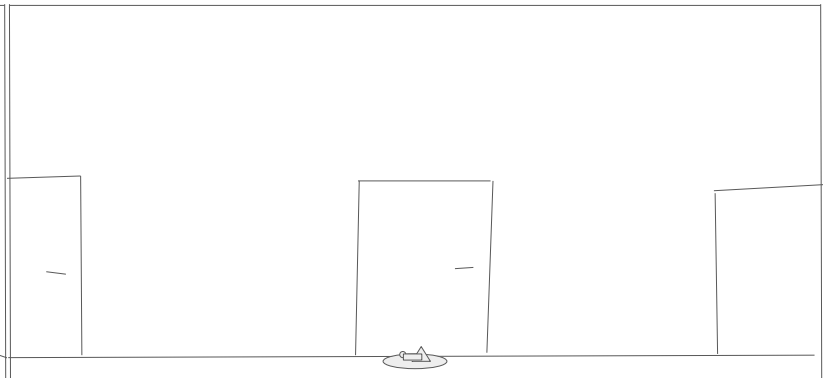
Thomas has been studying really hard in school. To get his work done more efficiently he has been going to the library, but this also means he is interacting with other people during the pandemic.



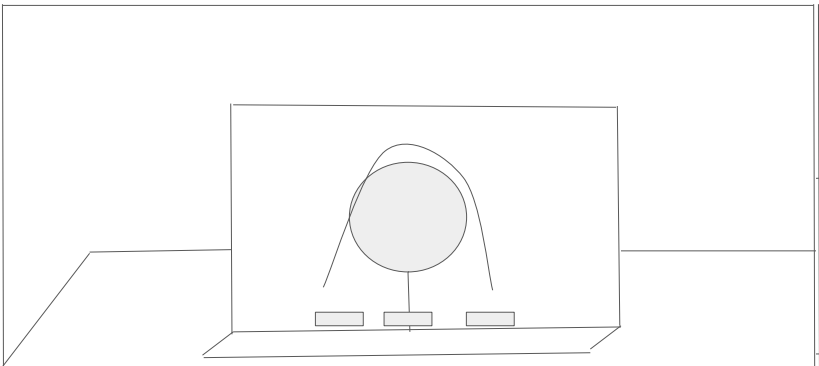
Thomas contracts Covid-19. He is transported to the campus Covid housing by a friendly student driver paid by the school instead of waiting for a bus that is usually late.



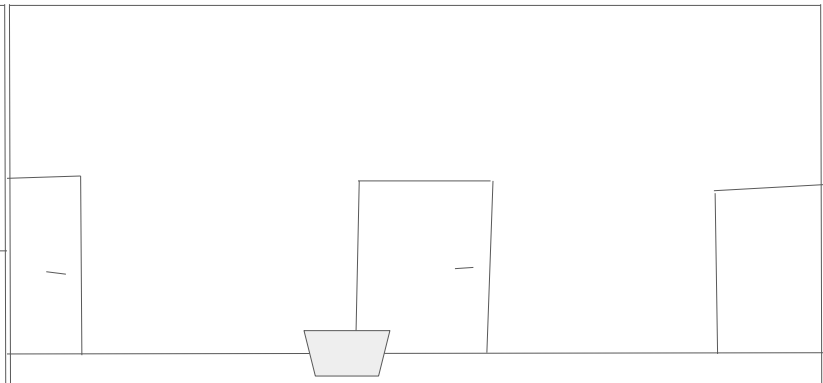
Thomas checks in to a clean room. He knows this is perfect for his studying, as he needs to be organized. He appreciates that the room was sanitized after the last student left.



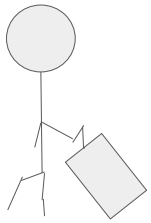
His healthy food is dropped off at the door so that he does not contaminate anyone else. It is also cheaper because USC has partnered with restaurants.

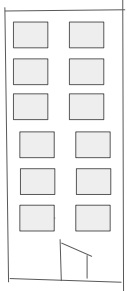


The health advisor checks in with Thomas every day to make sure that he is feeling ok physically and mentaly.



Thomas leaves his laundry outside when he runs out of clean clothes. They are washed in a washer uniquely for Thomas and then delivered outside his door.





Thomas leaves the Covid housing with a smile on his face.

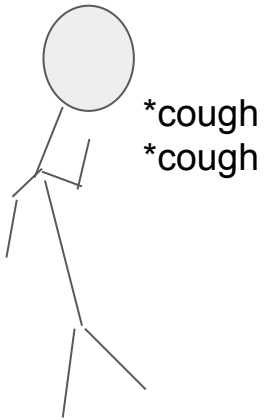
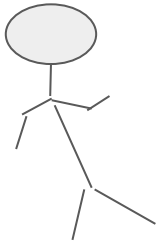
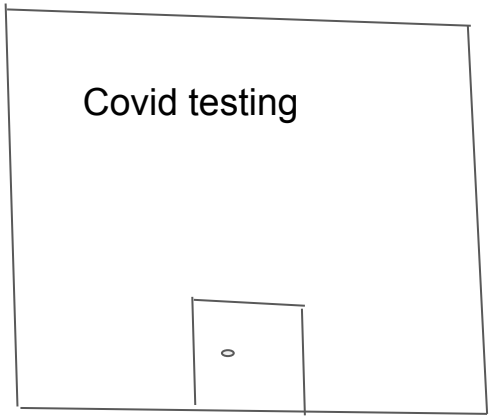
Joe is on his daily run in the morning on USC campus



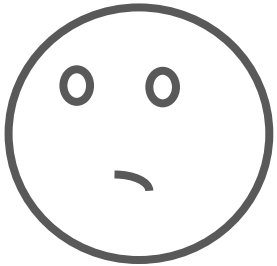
Joe notices that he is having a harder time breathing than normal



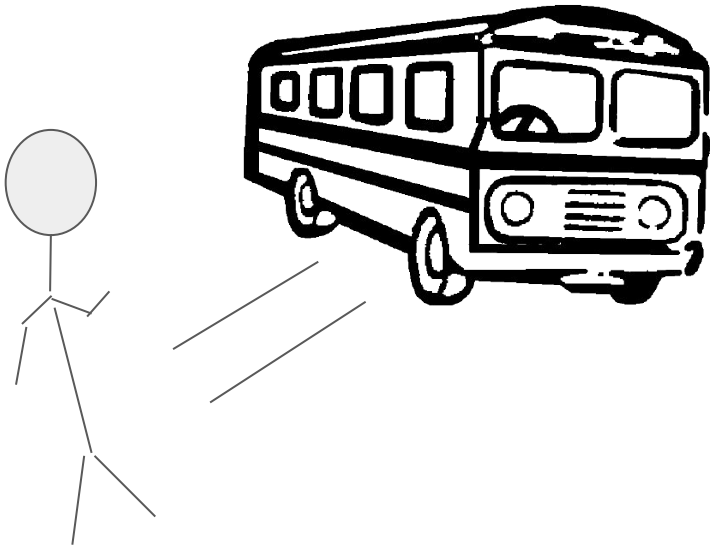


Joe is concerned so he visits a covid testing center to see if he has contracted the virus

CoronaVirus Test results: +

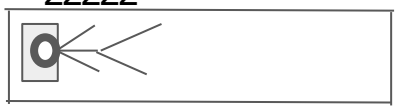


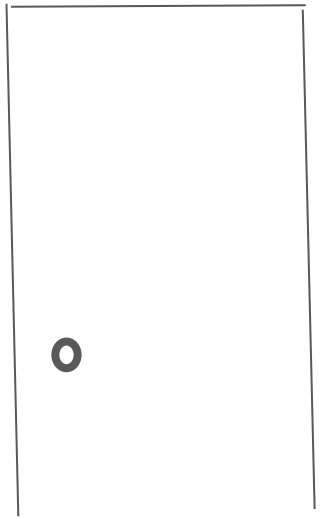
Uh oh! It turns out joe has contracted the virus! It’s time for him to go to covid housing



Joe find the transition to covid housing effortless because of the system that has been implemented

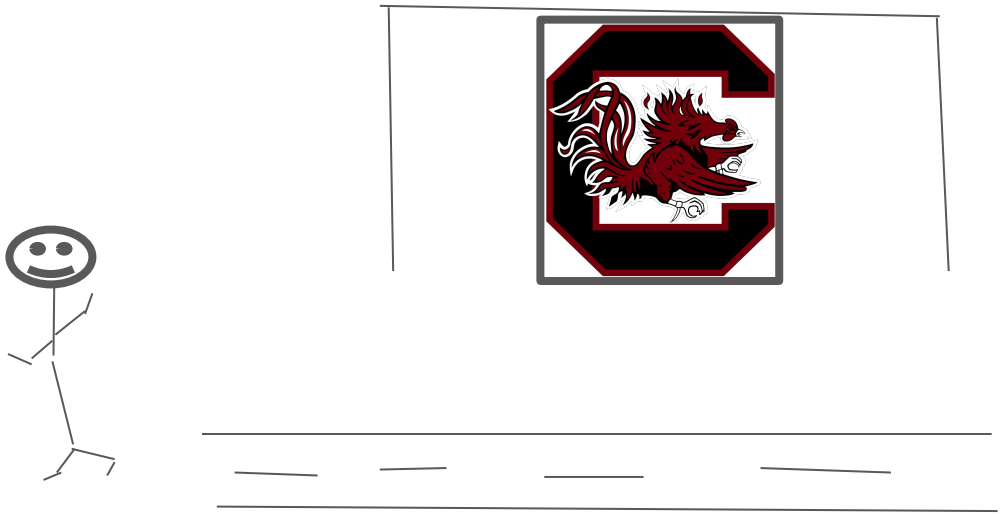
*zzzzz



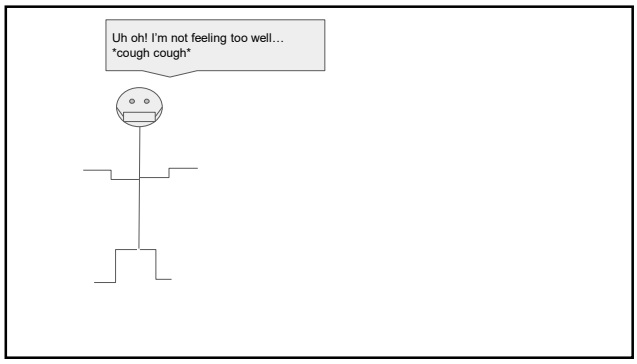


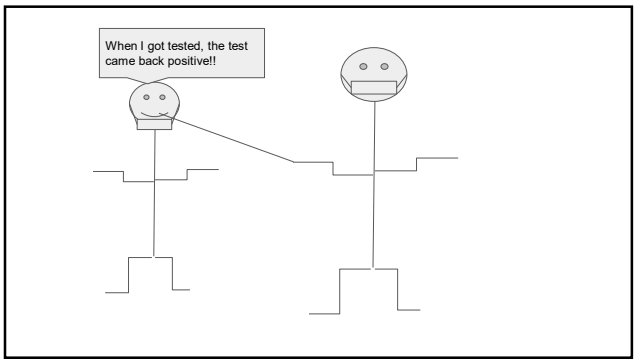
*knock
*knock
“Food
Delivery!”

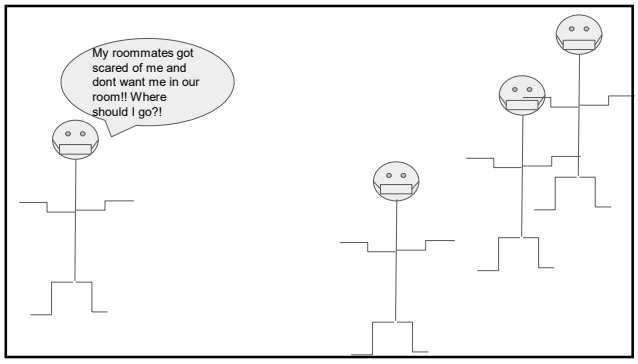
Now that he has arrived in the housing, he needs food and water to help his body heal itself. Luckily he has access to affordable and healthy meals, with 0 contact!

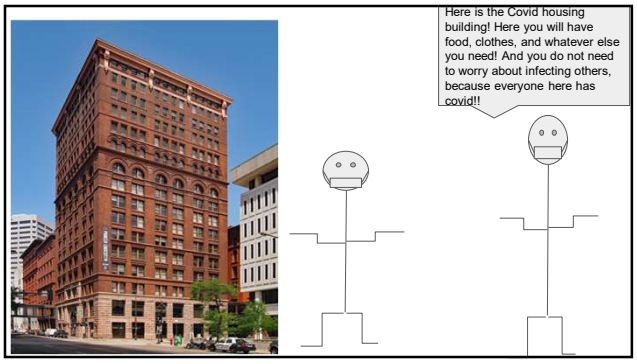


Because Joe was able to receive medicine from the staff available at covid housing and healthy meals, he has no recovered quickly without infecting anyone . He is now able to run again

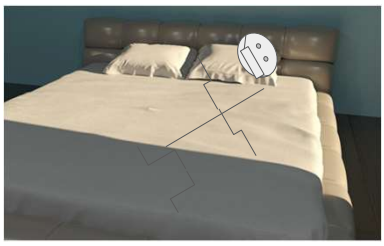


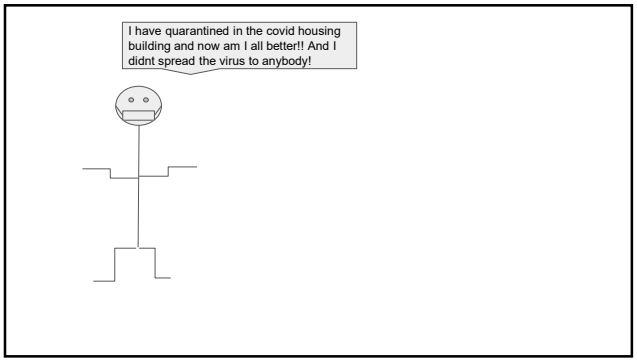


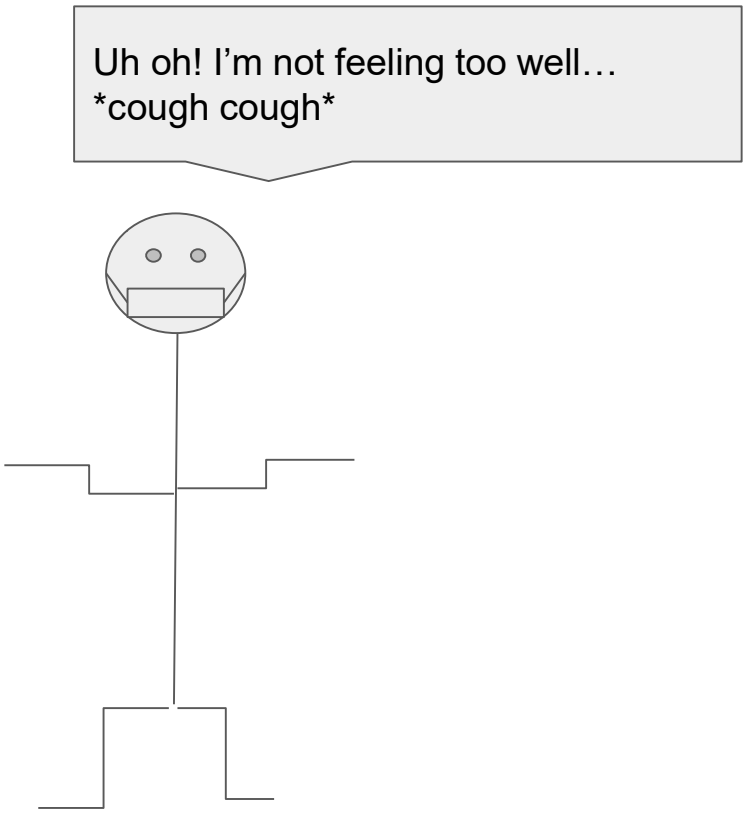




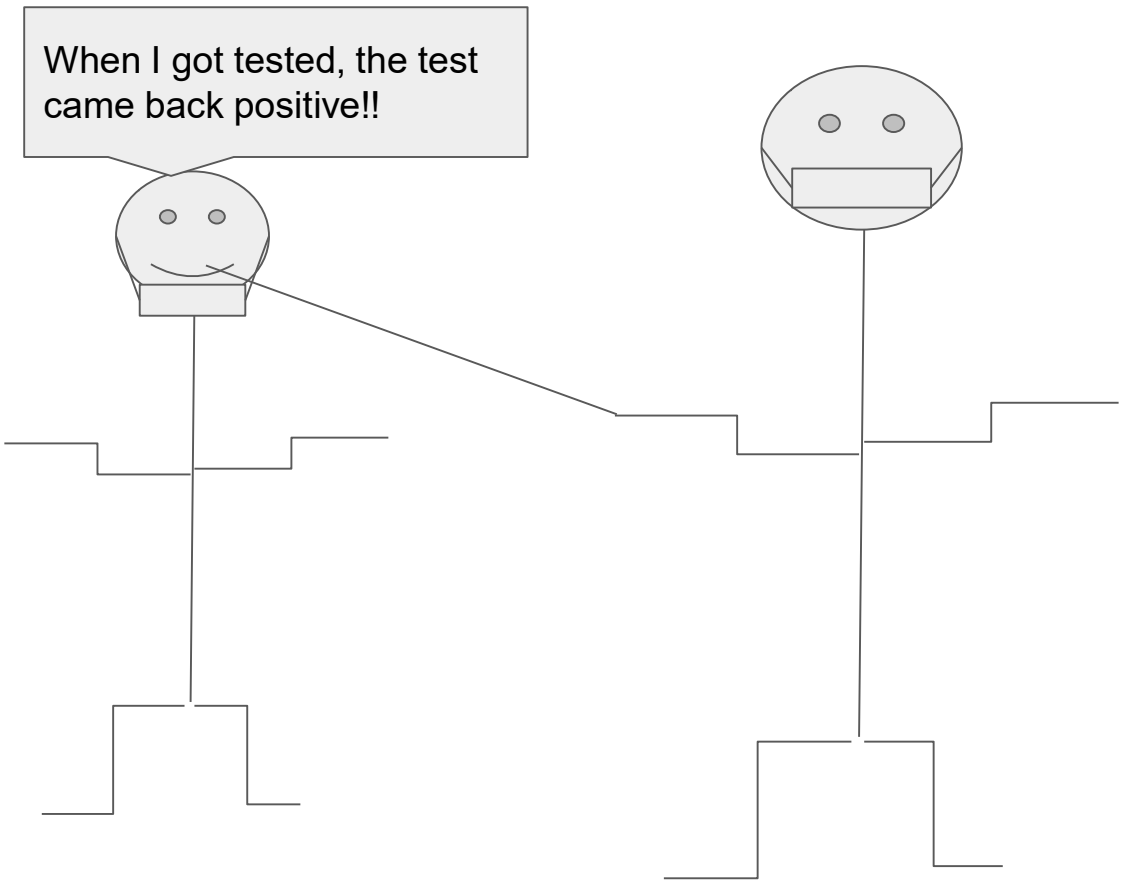
While you are at the covid housing building, you can just stay in bed and rest until you feel better. There will be no need to leave your room at all! You will have everything you need in your room so you would not have to leave at all! If you are hungry, people will bring you food, and if you have no more clothes, you will have a washer and dryer in your room.



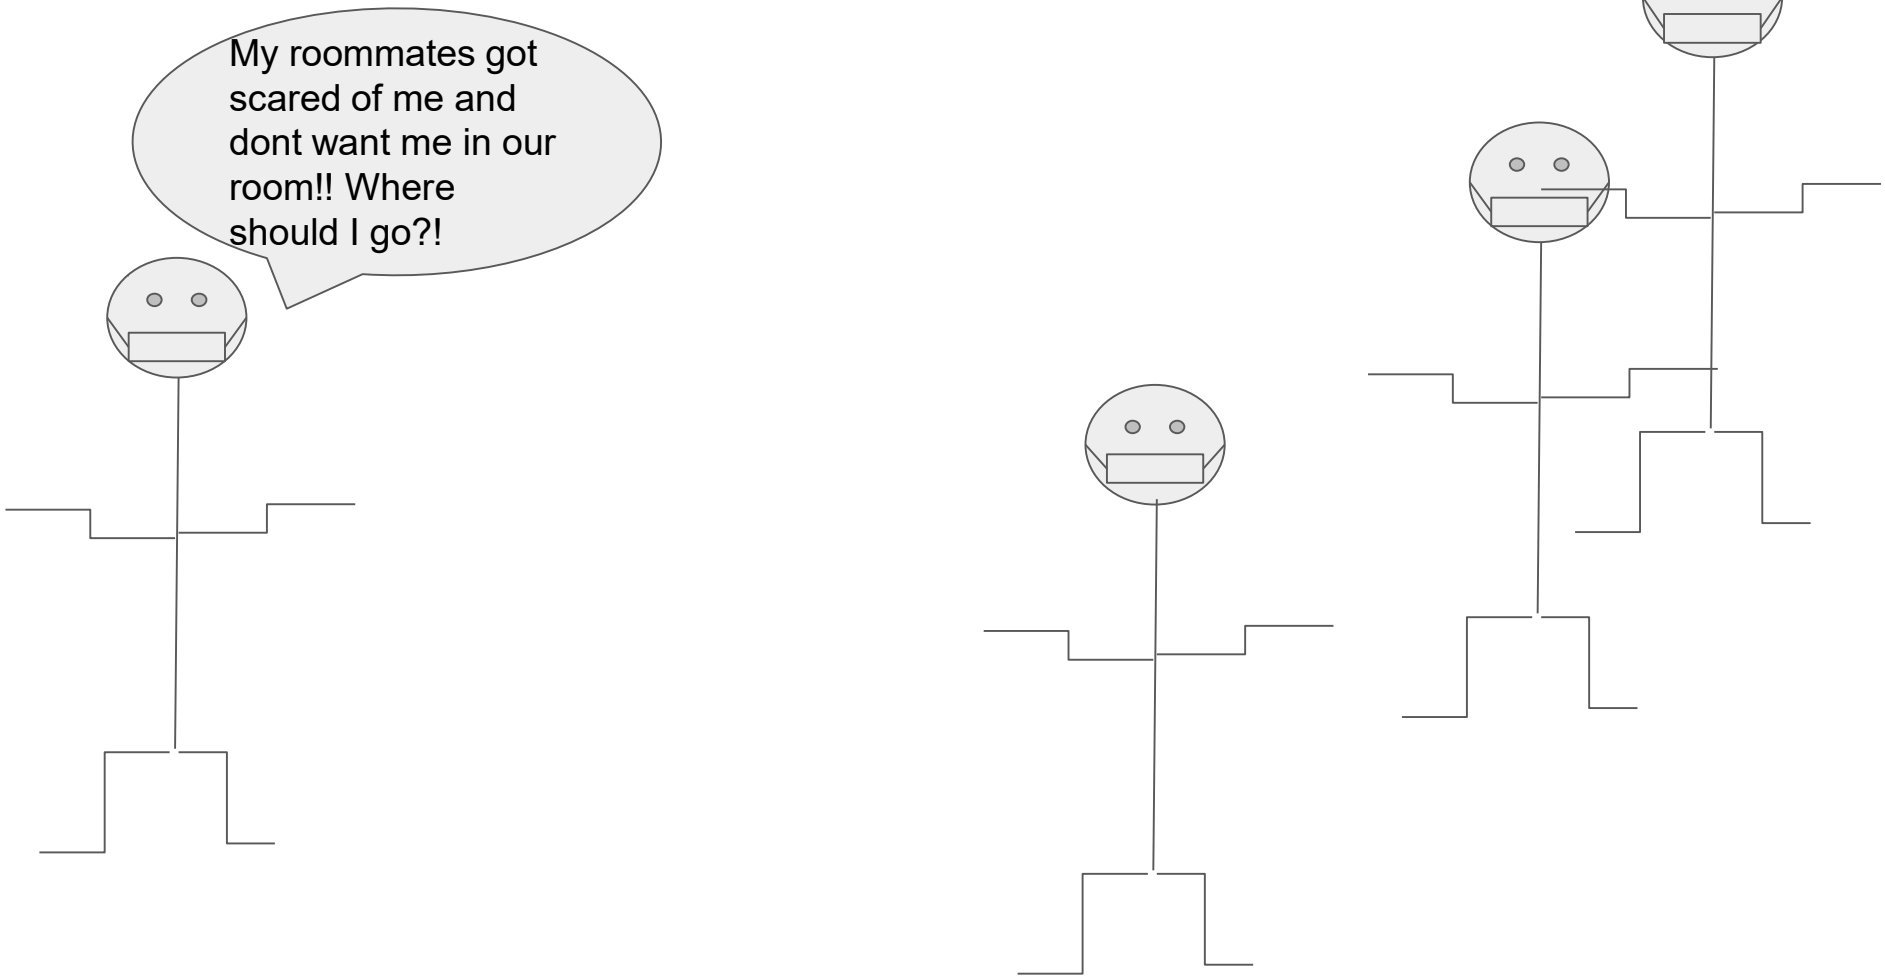




Uh oh! I’m not feeling too well…
cough cough

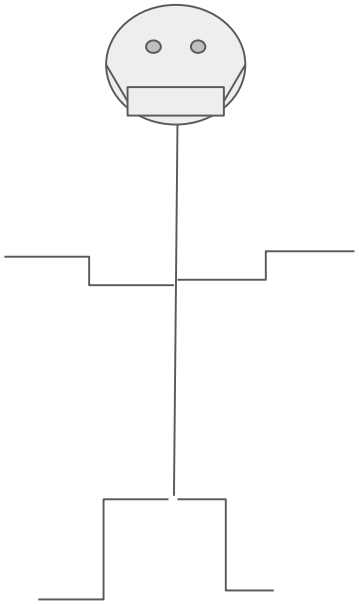


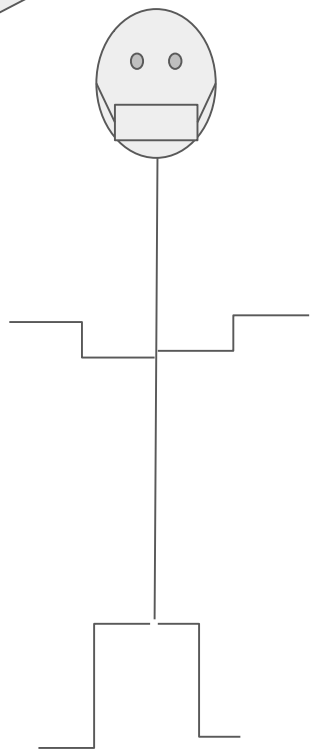
When I got tested, the test came back positive!!



My roommates got scared of me and dont want me in our room!! Where should I go?!

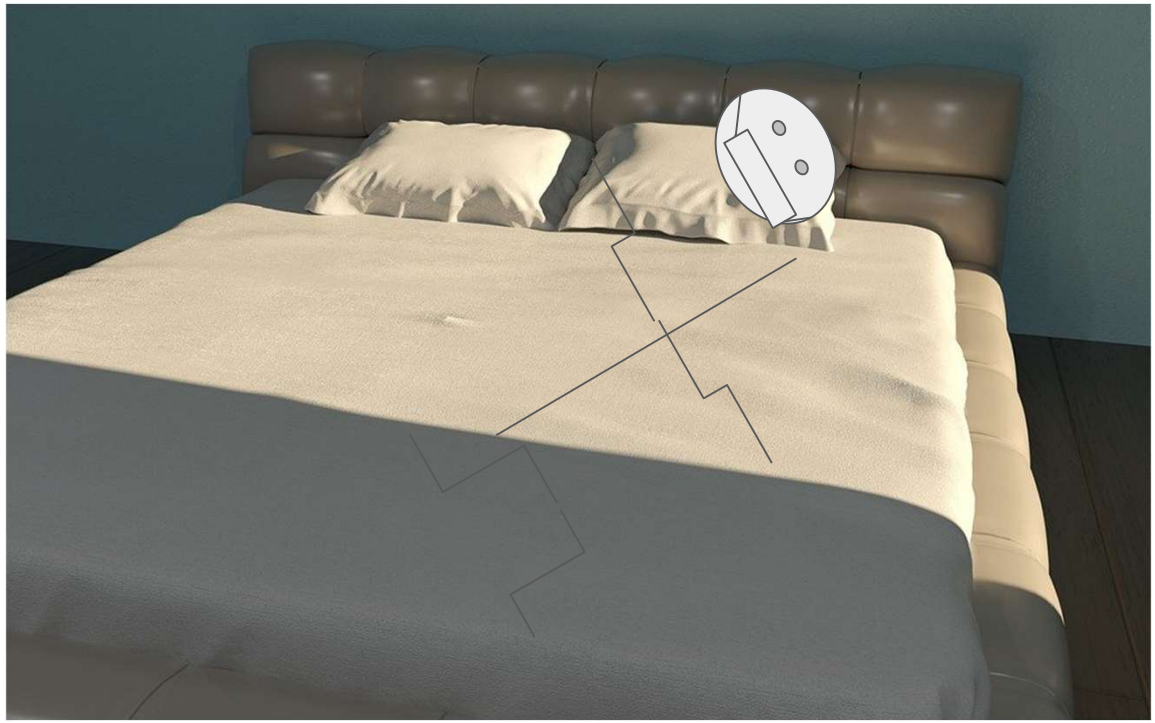
PIONEER BUILDING



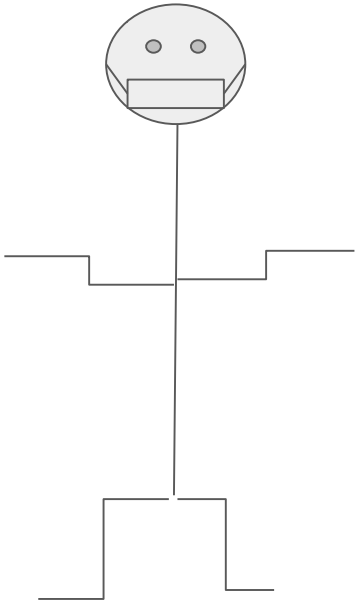


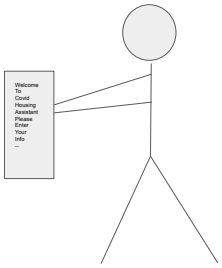
Here is the Covid housing building! Here you will have food, clothes, and whatever else you need! And you do not need to worry about infecting others, because everyone here has covid!!

While you are at the covid housing building, you can just stay in bed and rest until you feel better. There will be no need to leave your room at all! You will have everything you need in your room so you would not have to leave at all! If you are hungry, people will bring you food, and if you have no more clothes, you will have a washer and dryer in your room.



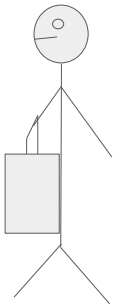
I have quarantined in the covid housing building and now am I all better!! And I didnt spread the virus to anybody!





Henry recently contracted covid, he first decided to call the support center to align a time to get placement in covid housing. They tell him he must download an app sponsored by the school that will assist during his time in covid housing.

Henry used the app in order to appoint a time to be picked up via a bus that could be tracked as to avoid confusion on the buses pick up time and where. He boarded the bus and was brought to the nearest building available for housing.



Once brought to the building, he could notify the app of his arrival and be provided a staff member that could help him move his things in.

Covid Housing, Menu

1. Steak
2. Pancakes
3. Bacon
4. Soup (tomato, clam chowder)
5. French Onion dip
6. Hamburger
7. Cheeseburger
8. Bacon Cheeseburger
9. Fries
10. Bacon Cheese Fries
11. Chili Cheese Fries
12. Raman
13. Egg

Once in his room, henry could access food and water options via his app and not have to go through the trouble of ordering over the phone or using an outsourced app. Also he could get whichever food he wanted from a menu.

Case manager: _____

Case Doctor Name: _____

Case manager #: _____

Case Doctor #: _____

Need medicine call: _____

etc.

Henry began to feel deeply ill midway through his stay but did not know the name or number of his doctor. But he needn't worry, he could use the app to find all his case doctor's information and could have the option of medicine being delivered to his dorm on the dot.

After Henry's 14 days in isolation, he was finally able to get back into the groove of everyday life and to do so he first had to move out. Once ready, his app would notify him the night before his exodus. It would also notify the building staff in case he needed help moving his stuff. They would load up a golf cart and head to his dorm.
